# What is Marble?

Marble is a  
crystalline,  
compact variety of  
metamorphosed  
limestone,  
consisting  
primarily of calcite  
and dolomite or a  
combination of  
both minerals.

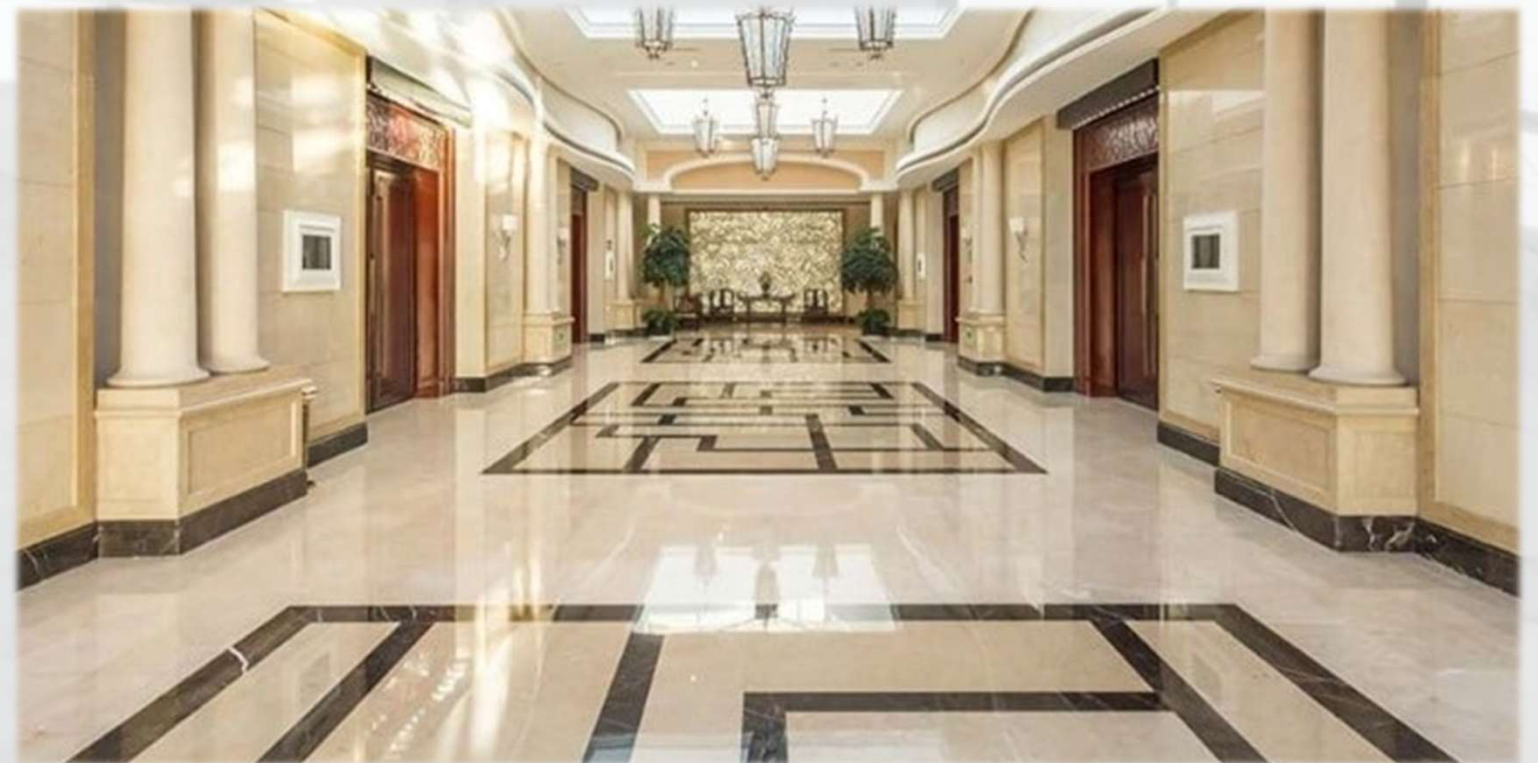

## FLOORING

- FLOORING is the general term for a permanent covering of a floor, or for the work of installing such a floor covering.

## FLOOR COVERING

- FLOOR COVERING is a term to generically describe any finish material applied over a floor structure to provide a walking surface.

# MARBLE FLOORING

- MARBLE IS A FLOOR COVERING
- WHEN WE USE MARBLE IN FLOORING

## Maintenance

- Marble are easy to maintain and can be re-polished if you need to bring the shine back .
- Marble is a porous material so if strong stain material is spilled on marble, it is recommended to wipe it quickly so that the marble does not absorb the stain
- For general maintenance you just need to wipe off the marble to remove the stains.
- Polishing can be done after a few years to bring back the shine.

# ADVANTAGES

- Marble flooring is known for its superior, royal and decorative appearance. It is considered as style symbol.
- Marble flooring is durable.
- Marble is also known for its' versatility in the art a from sculptures to monuments and from wall tiles to floor tiles.
- Cool surface of marble tiles can be quite pleasant and comfortable during the summers.
- Marble flooring is very easy to maintain and requires occasional sweeping and polishing.

Thanks
